(54) Title: PROCESS FOR MAKING A COATED OPTICAL LENS FREE OF VISIBLE FINING LINES

A

B

(57) Abstract: The invention concerns a process for making  
a coated optical lens blank free of visible fining lines  
which comprises : (ix) providing an optical article having at least one  
fined but unpolished geometrically defined main face ; (x) pro-  
viding a mold part having an internal and external surface; (xi)  
depositing on said main face of said optical article or on the  
internal surface of the mold part a requisit amount of a liquid  
curable coating composition ; (xii) moving relatively to each  
other the optical article and the mold part to either bring the  
coating composition into contact with the main face of the op-  
tical article or into contact with the internal face of the mold  
part; (xiii) applying pressure to the mold part to spread the liq-  
uid curable coating composition on said main face and form a  
uniform liquid coating composition layer onto the main face;  
(xiv) curing the liquid coating composition layer; (xv) with-  
drawing the mold part; and recovering the free of visible fining  
lines coated optical article.
